Carlos Jorge Rodríguez Cuello

Havana, Cuba rodriguezcuelloc@gmail.com carlosjorger.github.io carlosjorger carlosjorger

About me

More than 5 years of experience as a Software Developer. I have contributed to optimizing complex multi-tenant systems that handle different types of clients, maintaining performance and refactoring their code.

My communication skills with the team have allowed me to adapt to diverse challenges and prevent propagating changes that could create conflicts with my colleagues' work or affect end clients.

Education

BS	**Universidad de la Habana**, Computer Science	Havana, Cuba
	• Thesis: Virtualización de Datos usando Dremio	Sept 2015 – Nov 2020
	• Advisor: Dr. Darian Horacio Grass Boada	

Experience

Myndgoals, Full stack developer — Havana, Cuba — Nov 2022 – present — 3 years 2 months

- I work for Opus EHR, a healthcare platform that tracks and manages patient data, improving customer engagement and admissions.
- Improved performance by over 90% for reports that aggregated information from the entire database.
- Was one of the founders and main maintainers of the Opus Assistant project, a rule engine for managing patient treatment protocols across multiple company clients.

JYGASOFT, Full stack developer — Havana, Cuba — Mar 2022 – Aug 2022 — 6 months

- I worked on a NISSAN Mexico car assembly system using .NET and AngularJS technologies.

Datys, Data engineer — Cupertino, CA — Nov 2020 – Mar 2022 — 1 year 5 months

- I worked using data virtualization tools to improve the data flow performance of a Cuban bank.

Projects

Fluid DnD — Jan 2023 – present

A `drag and drop` library for sorting lists. Currently supports *vue*, *react* and *svelte*.

Skills

Languages: JavaScript, C#, TypeScript, SQL, HTML, CSS

Frameworks: .NET, Vue, Sql Server

Aditional Skills

In my free time, I continue my perpetual training as an engineer by reading books, articles, documentation, or watching tutorials.
